

Maxi-Mix Inc.

Maxi-Mix Silo Specifications

Dimensions: 8' X 8' X 23' (approx. height)

**Silo Weight: 5,000 lbs. empty
80,000 lbs. full (40 Ton)**

Point Loads: 20,000 lbs per leg

Clearance Needed for Set-Up: minimum of 26' clear

Clearance needed for entry and refills: Minimum 14' clear

Delivery and Refills: The silo is delivered by a truck with a specially designed set up unit. The ground area where the silo sits MUST be able to support 40 tons. When the contractor reaches the "RED LINE" marked on the silo it is time to order a refill from the MAXI-Mix office and a pneumatic tanker will arrive at a scheduled time to the site and perform the refill. This takes approximately 60 - 75 minutes.
